

Universal Design: Best practices, challenges & compromises

featuring **Emory Baldwin, AIA, CAPS & Bruce Waltar, FabCab**

Thursday, July 9, 2015 • 10:00–11:30 a.m.

Seattle Municipal Tower Room 4050–4060

700 Fifth Avenue (5th & Columbia), Seattle

For driving, transit and pedestrian directions, visit www.environmentsforall.org/about_us.htm#directions.

The Northwest Universal Design Council invites you to hear FabCab principal architect Emory Baldwin and project manager Bruce Waltar present best practices as well as challenges they face in weaving Universal Design into their projects. FabCab, Inc. specializes in socially sustainable housing that responds to the changing needs of people over their lifetime.

The presentation will focus on lessons learned in designing and constructing a 1,325 sq. ft. home in Port Townsend to meet their client's long-term goals: housing for a lifetime and accommodation for grandchildren and visitors, including those with disabilities. The audience will include other members of the FabCab team. All are welcome to join in discussion of how clients, contractors, and real world issues can impact Universal Design best practices.

This presentation is free and open to the public.

If you require an accommodation in order to participate, contact NWUDC coordinator Irene Stewart (irene.stewart@seattle.gov or 206-684-0662) at your earliest opportunity.

The Northwest Universal Design Council (NWUDC) promotes incorporation of Universal Design principles, products, and processes in the built environment so that all people can “live actively by design,” regardless of age or ability. The NWUDC is supported by the Seattle Human Services Department/Aging and Disability Services, the Area Agency on Aging for Seattle-King County (www.agingkingcounty.org).
